

on it. The wife of the professor from San Francisco Seminary and Mrs. Albright did not seem to get along, and I heard each of them making derogatory remarks about the other. One day the folks from SF° Sem° simply disappeared and we were told that they had left the school and moved to the American Colony. Just a few days ago I was reading the biography of jDr. Albright and found that there had been real trouble between the two families and that although the professor is not/~~named~~ ^{named} in that book it mentions that one of the people ~~in~~ ^{there}, a professor from America, had sent complaints about Dr. Albright to the headquarters, and when we Albright was off with us on a long horseback trip they had a letter had come ~~from~~ to Dr. Albright from the president of the schools, enclosing the letter this man had sent, criticizing them. Th book tells how Mrs. Albright handled the matter very well.

I should also mention; that people were coming and going nww and~~f~~ then from the School. One was a minister of a church, I think he was a graduate of Johns Hopkins, a minister in a church in North Dakota, and there was a parofessor Lee from Yenching University in China who had ~~studied~~ studied at Drew University in the U. S° and spoke English~~w~~ well. Also, Professor Jirku of Breslau University came to participate in the spring trip. The biography tells that this spring trip had many less fewer people than usual in it. That's getting ahead, though. I should mention that before that time the man from Professor Lee, the minister from N.D°, and one or two professors or men from Scotland; one was a Professor Mauchline, I guess they and I were the whole party They made atrip to We arranged to make a trip north as far as Damascus and back in a car. One of our group looked for a car we could rent ~~with~~ with a driver. There were two that would cost us about the same; one cost a little ~~more~~ more than the other, but the driver claimed to be a guide, so they thought it was the better buy, and we got him. As we would go along I would ask him; "What mosque is ~~that~~ that/" and he would say, "Mohammedan mosque." His ^{other} guiding was about of that order. He was a good driver but otherwise the/~~other~~ would probably have been just as satisfactory. We had a pleasant trip together and saw many interesting things. Dr. Albright had mentioned various placed we should go and
