

completing areas into which I had only made a start made only a start
 and getting ~~ix~~ the material into proper shape (repeat?) is the primary
 task to which the Lord desires me to devote as much energy as I possibly can
 during the remainder of my life. I believe that this should have absolute
 not it to be interrupted by anything that can be avoided
 priority and that I should/~~not~~ allow anything to interrupt it that I can help
~~greatly~~ greatly

During the years I have/enjoyed lecturing. I have also found and
 still find it most tedious to try to put materials into good written form
 or voice
 where, without the benefit of gesture, facial expression,/emphasis, the idea
 can clearly come through in cold print. I find this writing very ~~is~~ tedious (]nd)
 and exhausting. It has always been far more pleasant for me to stand up and talk.
 Yet, as I listen to the tapes I wonder how much good they would actually give
 anyone others unless who did not have the opportunity of sitting and
 watching the fa various things that ~~may~~ enter into a lecture and the
 conveying
 v which very often play a great part in carrying the meaning. I am
 accomplish
 praying that God will give me time and energy to make a considerable (noun here?)
 in relation to this task. I believe I have enough material in hand to spend
 fifty years working at my present as hard as I am able to at present
 with getting developing the insights God has given me and putting them
 into decent shape for publication. I of course have no reason to think that
 God will give me that much time, and therefore feel that I have an important
 task of selection that should be performed rather as soon as possible ~~and~~
 after I complete the present task on the prophecies of Daniel.
