

from the required curriculum. It used to be you had to have one for four years in high school, one for two, and both of them for atleast three years in college. But that is all done away with now. They are not required of anybody, as far as I know, either in highschool or in college. Well, this book said, they were done away with, ~~and~~ the result as the result of these experiments. The people who performed the experiments, and studied the experiments, reached a conclusion from the experiments, the exact opposite of what the experiments teach. They did it because they were so anxious to reach that conclusion. Now they are no longer anxious, because Latin and Greek have been removed ~~from~~ from our compulsory curriculum. Very few studied it anymore. That theory of education is ~~also~~ done away with. Now we can study the experiments impartially, and now we see as we study the experiments, that actually acquired ability is transmitted, and anything you learn to do increases your ability to do anything else, and anything you learn increases your ability to learn anything else, that is proven now. But the results of the previous experiments were carried out, and it changed our whole educational system. People then, can advance silly or wrong arguments for things, and humanly speaking, there is no way to prove that the Jews did not accept some of these books on some pretty silly arguments. And that is a process which went on. There were not very fantastic arguments, or pure accidents which determined that they accept one book, and reject another. I mentioned to you the advertisement which appeared on the inside of the back cover of TIME magazine for a period of atleast three months, about ~~twenty~~ twenty years ago, which showed a picture showing some men in a big meeting, somebody with ...8 $\frac{1}{2}$... on his head, and it gave you the impression, big stirring events are happening, but you didn't know just what. Underneath it said, Do you know what books were in the Bible ~~removed~~ simply because somebody was angry? Or were left out just because somebody was angry? Or got in there because by one vote they got a majority in a council, or decided what books should be in ...8 $\frac{1}{2}$... Wouldn't you like to read these books? ~~Send~~ Send five dollars to us, and we will send you the lost books of the Bible. And they must have made alot of money on it, because it took an awful lot of money to put an ad on the whole inside of the cover of TIME magazine for three months. The;
