

and there are so many people in America who are trying to adopt this teaching or the other teaching . You take a man like E. Stanley Jones and he talks about the Communist statements from everyone according to his ability to every one according to his need and talks of it and likens it to all other professions about this great ideal. (10 1/2)

(11)
 A ctually it isn't a great ideal. It is a statement which means absolute management
 It could not possibly operate except under the control of absolute and knowledge and
 intelligence beyond any human being to carry out the communist slogan and have it work
 that effectively. Now we won't be able to spend much more time on the Russian system. We
 have much of the history since that time to go over in our next few sessions. And also there
 are certain basic principles that we want to deal with that are very vital in connection
 with it. You have the assignment in Palmer and the assignment in A. I'd like
 to take just a little bit to say something about the examination. The examination of this
 course, which will come after we have two more sessions, will be based to a large extent but
 not exclusively ~~to~~ what we have covered since I have with you. That is to say that we will
 deal with the material in class and from the assignments that were made from this period ver
 definitely and very specially. And there also will be a definite portion of you final
 on your reading which was assigned previously. That is a background to this and cannot be ..
 but that will be a comparatively small part of it. I would say that if you have a perfect
 knowledge of everything I've said in class and everything I've assigned so far and don't
 know anything about wha'ts before you could probably still get 70 in the course. (Everybody
 in the class laughs heartily!)
