

Now, the other two points of ~~criticism~~ criticism of the social gospel, I fear I had better not give you this morning. Because our time has gone a little faster than I thought it ~~w~~ might. But I ~~don't want to~~ want to mention them anyway.

~~Modernist~~ This modernistic push, which is characteristic of the leaders of the World Council, and of the National Council in this country, for a different social order has three things on which I wish to criticize them. First, that it puts secondary things in primary place; Second, that it is impotent to accomplish its desired effects. That is, that the effect it wants to accomplish cannot be accomplished in this way. And Third, even more important, ~~is~~ its goal, that is its goal of introducing a new socialistic or near ~~socialistic~~ communistic order, its goal is a wrong one which is dangerous and harmful.

I believe that we should oppose it, most because it puts secondary things in primary place, but I think that this third point is so important, that it is vital that we ~~also~~ also take a stand in relation to it. It is ~~very~~ very vital. But I won't have time to say any more about it this morning.  
(end of record)
