

something very superier to us, something with wings. We were fishes, and I believe we will be crows, but you must read it. Waving aside _____ protest, I do not believe I ever was a fish. She goes on with serence confidence, "Oh, but it is all true. You understand, it is all science, not like those books in which one says one thing and another another and both may be contrary. Everything is proved by geology." Now, this was a populare novel 12 years before Darwin wrote his book. So you see, the idea of evolution was nothing new when Darwin issued his book, though Darwin's book made a tremendous impact upon England and upon the whole world, but what Darwin set out to do was not to deliver something new that he had discovered, the idea of evolution. That wasn't it at all. He had an entirely different thing in ~~ma~~ mind. It is what he called natural selection and for which he used the word that Herbert Spencer had already been using, survival of the fittest, and Herbert Specer had been teaching evolution following Lamarc, and issuing his books about evolution well before that time , but what Darwin did was not to originate evolution as entirely ~~dit~~ f different. I have a most interesting book here. If you come ~~aer~~ across this paper -bound book for a ~~k~~\$1.25, its well worth you r buying. Its Darwin, Marc, and ~~W~~ Wagner, by _____, who is the dean of the graduate school at Columbia University. He's not a fundamentalist by any means. He thoroughly accepts evolution, but he ~~thro~~ thoroughly debunks Dawrin. And some ~~te~~ of it is very interesting and very well worth reading, and he brings out that fact. Most of our ...he brings out some very interesting facts and one of them is this, that Darwin ...natural selection not evolution, in fact, the first edition of Darwin's Origin of the Species doesn't even use the word evolution at all. He does often speak of my theory, but his theory is natural selection. Now ~~k~~ in order to show the impact of Darwin, I would like to say
