

#7  
~~but this can be an early~~, but this <sup>1x</sup>man can be an old man, because <sup>b</sup>he just like  
 man, because he is so much like man today. So, it must be that this man ~~ma~~  
 was \_\_\_\_\_ (2.50) there. Well, that's like a white man today, and he said,  
 well, this is very rare. How about this \_\_\_\_\_? So, to me that casts  
 a big question there concerning this. (Q) As I understand, the Golden (or Gordon)  
 theory again is that the gene can be gradually changed inside it ~~=~~ and we can't see  
 it, but when the time comes when the gene reaches the point where out of \_\_\_\_\_  
 like a ~~bird~~ <sup>"s</sup> ~~bird~~ nest, but this happens only once in a million years, and  
 consequently, you can't prove it, and maybe ~~you~~ it's going to happen again in  
 about hundred thousand years from now, but, (Q) There is no evidence at all.  
 It's purely, it must ~~be~~ have been, because if they weren't created, they would...

(Q) Well, I don't know ~~it~~ if ~~Gold-~~ Gordon Smith(?) believes in that, but this  
 Julian Hudson says that. Julian <sup>Huxley</sup> Hudson, in his book here he feels that  
 by a purely natural process man has developed, but that now man has developed  
 his mind, and we help <sup>now</sup> mind, now we can use our mind to direct evolution, and  
 consequently we can develop in all kinds ways as we like, but I think ~~there~~ that  
 is more mental than biological, but he feels that ~~evolution~~ evolution gives the  
 answer to everything. And it is very interesting that this is the attitude of  
 Julian Hudson who denies all religions, but that William Henry ( \_\_\_\_\_ ) (0.65)  
 who, I told you, <sup>his</sup> whose grandfather who so hated church that toward the end of  
 his life he ~~formed~~ was put on a committee who studied ~~the~~ education and \_\_\_\_\_ recommendation,  
 in his recommendation he urged that the Bible ~~is the~~ is the plan and the foundation  
 of all British education, because it is \_\_\_\_\_ high/morality and in education.
