

They have tremendous faith . You take a little child and give him a typewriter , start striking and if you get a whole sentence typed why it will be a miracle . You would get many words . I don't like the word push-back sort of like Darwin objects to the word higher . They said a higher organism he said no it is just pure chance there is no higher or lower . I like to say if the Bible says something I stand on it but where the Bible doesn't say I don't know and it is if I were to say to you last month I came from Los Angeles to Philadelphia . You would know from that that it happened that I left Los Angeles and came in this direction and came to Philadelphia . You wouldn't even know if it was in this direction I could have gone around the world . You wouldn't know from that if I came in an auto , an airplane whether I swam around South America , whether I came on horseback, whether I walked , the method I used You wouldn't know whether I stopped over somewhere . There could be a thousand questions you could ask that would not answer the three things that I did. That I came, that I started there that I finished here and that it happened last month and when it says God created Adam that is definite but it does not say when he created him so I don't know so I don't push it back or I don't push it ahead . I just have no idea and, of course, people used to say ~~that is definite but it does not say when he created him so I just don't know~~ five hundred years ago they said the earth couldn't be round because they said when you got to the other side you would fall off well we laughed at that but that was good sense, that was very good sense . How on earth could it be . It was nonsense to be thinking of a round earth when you were explaining the earth until Newton discovered the law of gravitation and nobody knew of it until Newton discovered it. Once you have the law of gravitation you can have a round earth but without it you can't so to anybody today a round earth seems perfectly natural but to somebody then it was nonsense. It is like where you read in the Bible that Jesus said the time will come when there will be two men working
