

there will be two men working ~~+-~~ in the ~~file~~ field ~~and~~ together, and one will be taken and one will be ~~left~~ left, or if ~~he~~ He should come at night, there may be two in the same bed, one is taken and one is left, but that is not what Paul said, He said that both things would happen at the time when He came. There would be working men sleeping~~x~~ in their beds, and there would also be ~~working~~ men working out in the fields. This suggests a situation when it will be both day and night. It does not say that the earth is round but it fits precisely with the situation as we know it today. A round earth where ~~half~~ part of the ~~we~~ world has midnight, while ~~the other half has noon~~ another part has noon. It doesn't fit at all with the idea of a flat earth in which it is ~~x~~ all day at one short period of time, and it is all night for another period of time.
