

sundaes first came into use and this person was given an ice cream ~~sundae~~ sundie. And after taking a bit said, My that must be wicked, it tastes so good! (I think that is a perverted attitude, but one which people have had at times through the ages. The world that God made is good. The beauty of the world is good. The joy of living a normal life is something that God wants us to enjoy. He wants us to see the beauty of the universe He has made

I read a book some time ago about a Swiss woman who thought she would like to learn about the great advances made by the ~~the~~ great experiment in human progress in Russia. So she went to Russia and took a course in the university. This was just shortly before World War II began. She was there working on her courses and not paying much attention to accounts of politics. One day there came a rap at the door in the middle of the night. She said, Who is there? They said, The police; put some clothes on quick and come with us. They took her to a prison, put her in a little cell where she had to stand up facing a light and stand there for six months with no chance to lie down, just to lean against the side to try to get a little rest. Every now and then they would come ~~in~~ in and ask her, Now confess! Confes! She said, I don't know what to confess. I don't know what you have got me her for! "Well, you confess what you have done wrong." Finally they came and told her that one of her friends had confessed and told how the two of them had conspired together against the Soviet regime. This friend had stood that way for a time and then had not been able to stand it any longer and so had confessed anything they wanted her to. So she confessed they both were. This woman was convicted and she was sent to Siberia.
