

over it in exactly the right way, and then a skilled workman brings a hammer down on it and hits that chisel and breaks that and if he is not an expert it breaks into a thousand pieces, and it is not worth anything then. But if he is really expert at it, - a blow he brings it against that diamond in just the right way so it breaks out into a beautiful diamond (indistinct)

So in life if we believe in Christ the important thing the important thing is whether we are accurate or not. It isn't whether we are (indistinct) or not, it isn't even whether we have enough to eat or not. The important thing is God moulding and making us into the kind of jewel that He wants us to be. So as things go wrong in your life, if you truly belong to the Lord, you immediately ask yourself: Did this happen to me because I made a mistake? Well that's where most of the troubles we have (come from), we made a mistake. Sometimes God overcomes our mistakes so that they don't have the results they would ordinarily have. If we are we can notice very often people that but the first time you make a mistake, God will very often let you bear its results in order to teach you not to make that particular mistake again.

Sometimes things go wrong in our lives because we have fallen into some sin. That we must watch very carefully. Every one of us has this in us that which would lead us into sin and disobedience to God. If you truly believe in Christ and you fall into sin, God will deliver you from it if you truly believe in Christ. But you will never accomplish what you would have in life if you had avoided that sin. God wants us to watch whether the troubles that come into our lives are due to sin. It is true that every trouble we have in life is due to sin, but it is not true that the particular troubles in your life are necessarily due to your own sin.
