

of Michigan to get a list of signatures for petition to the President Johnson asking that the United States stop ~~the internal interference with Southeast Asia~~ in the internal affairs of Southeast Asia. He asked me to sign and to get as many of my colleagues ~~of mine~~ to sign it as possible. The paper <sup>s</sup> told shortly afterwards how this professor was one of the groups that were received by the President Johnson, and how he ... that the United States absolutely have no business interfering in the internal affairs of Vietnam. What a change has come over to our educational system. What has brought it about. Who are the extremists? First, Let us look for a minute at one or two passages from the word of God. /I would like to call your attention to the 20th chapter of Luke. Education is a difficult field// for the average person to asset, and it is easy/to say, Let us ~~get~~ <sup>for him</sup> <sup>give</sup> some money, and let us vote great sum for education, but as to what kind of education or how it shall be handled the average person knows little about it, and therefore, it is easy for him to ~~strike~~ <sup>shrug</sup> his shoulders, and say/<sup>well,</sup> that we will leave this to the expert. Indeed there are certain areas which must be left to ~~the~~ experts, but it is the duty of every person to make judgment as to which experts are to be given the task and how the next generation of experts are to be trained, and indoctrinated. The difficulties of the educational field become apparent by sad experiences. Forty years ago, there was a college which has ~~fallen~~ <sup>fallen</sup> the Modernist hands, and leadership found itself unable to carry on the college. A fundamentalist group agreed to take over the college. This college in Iowa was turned over to them, and they/<sup>proceeded</sup> immediately to undertake to make into a thorough-going Christian college. Unfortunately they had no expert in educational administration. No one who could <sup>task</sup> ~~sure~~ know how to handle the ~~matter~~ properly. Eventually the leaders decided that ~~they order~~ simply order that it be closed down, and eventually the leaders decided simply order that this be closed down, and abandoned. Education is a technical field. It takes experts to run it. A person has to have a certain natural gift and ~~has to have also those who have had training~~ also has to have training in educational administration, or he cannot be expected to make a success in this field.
