

for similar indoctrination in college. When I was in college a book came up out by Upton Sinclair, ~~I forget~~ it was called the goose steppers, and the purpose was to show ~~that~~ how the American educational system was under the control of the ~~x~~ capitalists and he ~~showed~~ showed how this ~~corporation~~ corporation had given money to this university and this one, and this corporation to this one and this, and this wealthy man to...and he ~~said~~ said they were all inter-related, and I having just finished what had shortly before that been a good Christian, Presbyterian college but ~~it~~ was just in process of changing at the time when I went there, and knowing the teaching that had been given there, and how much ~~x~~ worse it would be in many other places, I thought How ridiculous our Sinclair statement, but worse yet, how fast ~~the~~ asleep are these people who are giving this money to colleges which are undermining that which ~~it~~ has made it possible for them to make the progress that they have made. It was Wm. Buckley a few years ago who wrote a book which he ~~he~~ called God and man at Yale. And he told (it was not over 10 years ago, I am sure, when that book came out). And ~~Wm~~ Buckley told how at Yale Un. in just about every dept. he said Collectivism was advanced and the principles of Americanism were denied and criticized and the very existence of God was ridiculed, I went to college a good deal earlier than Buckley did, but I saw the situation very ~~similar~~ similar. We had a president in our college there who had been a teacher in a Presbyterian ~~x~~ Seminary, he came claiming to be a great Christian leader. but he was determined to ~~x~~ advance what was the general spirit of the day. That was already 40 years ~~ago~~ ago. And this was his attitude there in the college. I did what little I could to counteract, it wasn't much, and yet, you know after four years in that college, a college of high educational standards, ~~after~~ when I graduated I said to somebody, you know everything I am really sure of I could write on the back of a two cent stamp. I had so much skepticism ~~planted~~ implanted in my mind, I think ~~it~~ that if I were not naturally a skeptical frame of mind, it would have destroyed my faith. But I am just skeptical enough to see enough
