

the man was giving them the husks that would do nobody any good. But the people though they wanted the Word of God were satisfied to put the word of man ahead of the Word of God and that is what this man was doing.

That's why my ideal all through my life, my purpose has been to train people thoroughly in the Greek and Hebrew languages and in sound methods of Bible interpretation so that they could go to the Bible and see for themselves the truth that God has for them there, and not take the word of man, or human ideas but take what God has given us.

I believe as Robinson, the great minister of the Pilgrim Fathers said in his farewell to them when they left Holland, he said I believe that more truth is == that God is going to cause that more truth will break forth from His Word.

God has put in His Scripture the truth that His people need in every phase of their work and God knew the whole future and He knows just what we need. Any man == Every man ~~errs~~ errs. And any man can err through ignorance. But the Word of God is that which we need. People are hungry, wanting the Word of God and they are being given a stone. They are being given all kinds of _____ and what our world needs is God's Word.

Of course these are very very important wiles of Satan and ways to mislead us, and if you during these four months--I remember ~~hearing~~ hearing a man tell, a man who became a great Christian leader to the country. He was _____ very rare in what he told me, but he said that when he was in seminary that he and a friend there used to get together every day and and they would take up the things presented in class. One would =would take one view and one the opposite. They would talk for a long time, the one doing his best to undermine what was being presented, the other doing his best to defend it. Then they would change places. The one who had been trying to undermine would try to defend it. They thought through all aspects of it.

In the course of that questions would come that they could raise to the professor.

We had a student some years ago who just loved thinking about ~~Veneloshkie~~ (??) and interesting ideas and theological.

philosophy
We tried to get him to teach a Sunday School class. Oh, he said I'm not interested in that. I'm interested in theological ideas and philosophical concepts. He said, I'm going to go out to be a minister preaching to adults. I don't want that at all. So he would not do it. He graduated, and took a place with a mission working in Northern Canada. We got a ~~letter~~ letter from him in which he said, "I would like to make a suggestion."
