Scandinavian Scholars

Harrelson, p. 33      Attacked mercilessly the "bookish" approach to the Pentateuch of Wellhausen and his followers. Entire approach of literary critics is wrong, they say. In place of documents one must put the living community of Israel and especially the leaders in the community's worship. JEDP are symbols that never existed and the "authors" who are said to have written them never existed.

B. W. Anderson, p. 155      View that nationalism produced a national literature has been challenged by important group of Scandinavian scholars.
