

D

simply

are not found in the Bible at all. God did not give us His Word for a banner, but for a guide. He wants us "to believe all that the prophets have spoken". He wants us to approach it scientifically and to study it carefully. Where the Bible is silent, we should not claim to know. As we study beneath the surface, we learn more and more of what the Bible really teaches. We can stand upon its teachings with utter confidence, knowing that nothing can ever shake them. Theories of scientists, and of philosophical theologians may come and go, but what God has declared cannot fail, for He, and He alone, knows everything.

B

It is sometimes as important to note where the Scripture is silent as to note the points on which it speaks. We ~~should~~ ^{should} never try to twist Bible statements into conformity with the latest pronouncements of science. Neither should we proclaim superficial interpretations of the Bible as contradicting present scientific theories.

the length of time of creation is concerned, there
