

more successful the nation will be.

Somebody said to me during the way, a doctor. He said, if there was another army~~s~~ ours wouldn't get the .....(2½) to do the job. By which he meant that there was ~~x~~, in his opinion, a great amount of inefficiency in the army, ~~as a~~ governmental organization, which if ~~xxxx~~ a private organization had, it would fall ~~be~~ by the wayside. Well, I think that there is a large amount of truth in that. The world ~~war~~ war had to be right on us before the army even began to make.....And you remember the situation when this general began wanting them to go in the air in a big way, how they court martialed him. IN any governmental organization there is a tendency for people to get good jobs and sit on them and stay there. It is a natural tendency. You lose the spirit of free enterprise and free ~~init~~ initiative, because you are not free, as a rule. When you get an idea to go ahead and try it out to succeed or fail with it, you have to get your ~~sp~~ superior's approval, and ~~xxxx~~ usually it is a good many years before they are even willing to consider it. We are in a different situation now, in that regard, because we have an emergency army, which stimulates determination to push ahead. But under ordinary circumstances, that is the case with most governmental organizations. And so, the more the doing of it is done by private initiative, the more successful the nation is. The answer, then, is ~~x~~ not the abolition of govt., you cannot carry on without govt., in a world of sinful men. You have to have govt. to enforce a certain~~xxxx~~ amount of morality. To enforce contrast, to get rid of murders, to protect against evil. A certain amount of morality has to be enforced by ~~govt~~ govt. And there are ~~x~~ certain matters of cooperation which might be worked out by absolute free negotiation among ~~individ~~ individuals. Often, there are too many individuals involved for it to be very handily done. And it does not matter how it is done, just so it is done well. And so, there is this second large sphere.

But the~~x~~ third sphere, of direction, there are certain things a govt. has to do, but the less it does, and the more it can stimulate others to do, the better it is. Down in South America I was in San Paulo, Braxil, and I was
